We maintain our leading market position through an unwavering commitment to innovation in both products and services. We combine the highest quality standards with competitive pricing, while maintaining a strict focus on safety, individual and collective well-being, and environmental management. Our Quality, Safety, and Environment (QHSE) policy reflects the core mission of COMTEC TCS: ensuring total customer satisfaction through continuous improvement.

## Our Commitment to Quality

Quality represents our challenge toward "zero risk" in products, processes, materials, and environmental impact, including those related to climate change.

Our primary goal at COMTEC TCS is the total satisfaction of our customers and stakeholders. We achieve this by providing safe and reliable products, supported by comprehensive technical, commercial, and logistics services both pre- and post-sales, designed to anticipate and meet even the most demanding expectations.

COMTEC TCS aims to implement a system that strives for "zero defects" across all company sectors. This goal can only be achieved if every employee feels involved and empowered to pursue the satisfaction of both internal and external customers and to drive the improvement of every internal process.

Our quality planning is designed to ensure cost reduction and shorter time-to-market while achieving the highest quality in every product and service provided. Furthermore, the constant growth of our supplier network and their reliability allow us to reach performance levels fully aligned with our defined objectives.

Our employees are a fundamental asset in achieving our "zero defects" objective.

## Health and Safety Objectives and Principles

The objective of COMTEC TCS is the continuous improvement of health and safety performance in the workplace, in particular:

- Reducing risks in the design of every product and process;
- Preventing all forms of accidents in daily activities, including those carried out at suppliers' premises and on temporary construction sites.

COMTEC TCS is committed to achieving this through all available means, particularly through the involvement of all personnel and training activities.

COMTEC TCS aims to be a trusted partner for all Clients, promote balanced development that is valued by the entire community.

COMTEC TCS pursues sustainable development through the planning of design and development phases for every single product and process, with the objective of minimizing any risk to workers.

- The prevention of pollution and risks to workers is implemented through the appropriate management of materials, substances, and processes, and through the correct operation, maintenance, and control of our own work facilities and equipment, as well as those of our main suppliers.
- Training and information are the primary tools for transmitting and communicating the principles, guidelines, and implementation methods of Safety measures to all collaborators.
- COMTEC TCS's focus on reducing the residual risks of its activities is also implemented through open and effective communication with people and external parties.

- It is necessary to involve product and service suppliers in Safety management to reduce the risks of work activities carried out within clients' sites.
- Individual and collective health and safety are an inalienable requirement: corporate decisions and individual behaviors are oriented toward this goal.
- The broadest and most widespread involvement of all employees is the fundamental requirement for the continuous improvement of processes and services regarding Safety aspects.

Our Environmental Policy is based on:

- People:
  - Awareness, involvement, and the sharing of principles and objectives.
  - Responsibility toward stakeholders.
- Processes:
  - Production processes with increasingly stringent environmental requirements.
  - A tendency toward the reduction of energy usage (gas, electricity) and waste production.
- Products:
  - Environmental impact of products throughout their entire lifecycle.
- Supply Chain:
  - Engagement of the supply chain through involvement and the sharing of improvement paths.

This document has been shared at all levels of the organization through training sessions and is displayed within our premises to ensure its understanding by all employees, collaborators, and all third parties interested in various capacities in the activities and services offered by COMTEC TCS.
